

MAINTENANCE MANAGER

for Microsoft Dynamics 365 Business Central

Streamline maintenance, maximize uptime, and ensure assets last longer.

Maintenance Manager by Insight Works offers a structured approach to maintenance management. Integrated seamlessly with Microsoft Dynamics 365 Business Central, Maintenance Manager facilitates efficient asset management and streamlines operational tasks. Customizable features and real-time data insights enable organizations to make informed decisions.

Maintenance Manager supports proactive asset care, leading to longer equipment lifespans and consistent performance. Embrace a new standard of maintenance efficiency with Maintenance Manager.

Unlock Efficiency and Sustainability with Maintenance Manager

- **Enhanced Asset Longevity:** Prolong machinery and equipment life through systematic maintenance.
- **Optimized Resource Allocation:** Maximize technician and resource efficiency with MxAPS for timely maintenance scheduling.
- **Minimized Downtime:** Proactively review maintenance flags during production to quickly address and prevent machinery breakdowns.
- **Cost Savings:** Reduce repair and replacement costs with proactive maintenance management.
- **Effortless Documentation Access:** Quickly access necessary manuals and documents during maintenance tasks.
- **Unified Data Management:** Ensure consistent and reliable data through integration with Business Central modules.
- **Data-Driven Decision Making:** Use comprehensive historical data to make informed maintenance decisions.
- **Safety Assurance:** Ensure easy access to safety documents and instructions for a safer work environment.

Typical Users:

Facility Managers: Ensure facilities and equipment meet efficiency standards.

Maintenance Technicians: Perform routine equipment maintenance and repairs.

Production Supervisors: Minimize downtime, maximize output.

Asset Managers: Oversee asset lifecycle and condition.

Field Service Engineers: Handle on-site repairs, especially in remote areas.

Plant Operators: Maintain continuous machinery operation.

Fleet Managers: Manage vehicle maintenance and safety.

Inventory Specialists: Stock and manage maintenance parts and tools.

MAINTENANCE MANAGER

Asset Tracking Capabilities

Efficiently manage equipment, machinery, and other assets within the organization through comprehensive warehouse and inventory tracking, ensuring all assets are accounted for and properly maintained.

Efficient Task Planning

Schedule one-time and recurring maintenance tasks, ensuring timely execution.

Streamlined Work Order Management

Create, monitor, and manage work orders with clarity on instructions and resource allocation.

Parts & Inventory Management

Organize and manage parts inventory related to maintenance, ensuring availability when needed.

Document Attachment Support

Attach and access relevant manuals, schematics, or other documents directly within maintenance tasks.

Seamless System Integration

Built directly into Business Central to effortlessly integrate with other Business Central modules for consistent data flow and reduced redundancies.

On-the-Go Mobile Access

Equip field technicians with the Business Central mobile app to access and update maintenance tasks, record time, and more from any location.

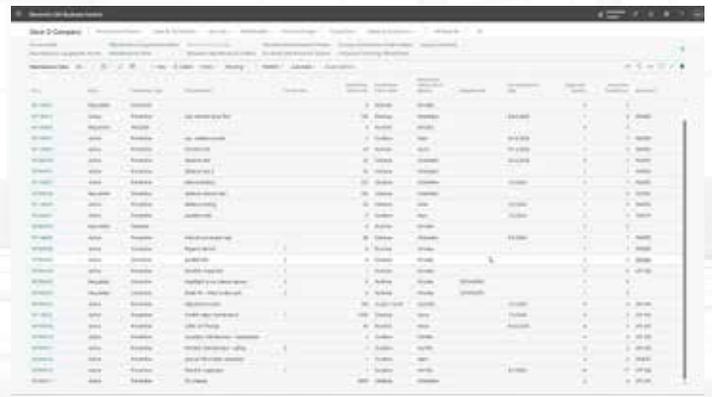

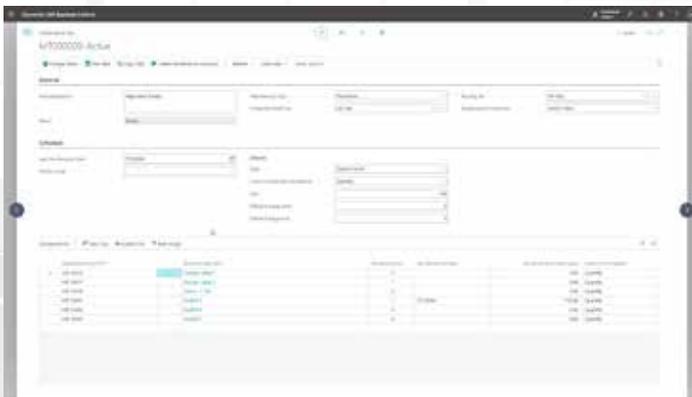

Comprehensive Historical Data

Use your analysis tool of choice to analyze maintenance operations based on equipment and maintenance history, gaining insights to refine processes.

Customizable User Experience

Adjust fields and forms to tailor the app to specific maintenance requirements and processes.
