SAFETY LOGBOOK

Incident Tracking
Record detailed incident information to ensure comprehensive documentation and regulatory compliance.

Employee Involvement
Link employees involved in incidents, including injured parties and witnesses, for accurate follow-up and accountability.

Injury Details
Log specific injury data, such as affected body parts and injury type, to support medical and safety reviews

Risk Assessment
Rate severity and probability to prioritize incidents and strengthen risk management.

Follow-up Actions
Track required corrective actions, such as training and work practice reviews, to prevent future incidents.

Organizational Linkage
Associate incidents with specific assets, departments, and projects for structured safety reporting.
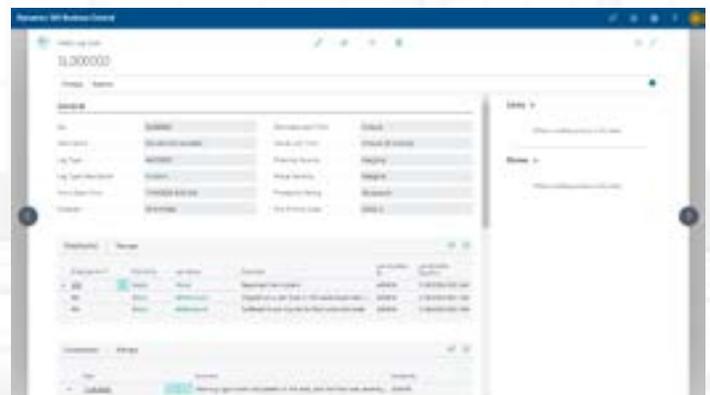

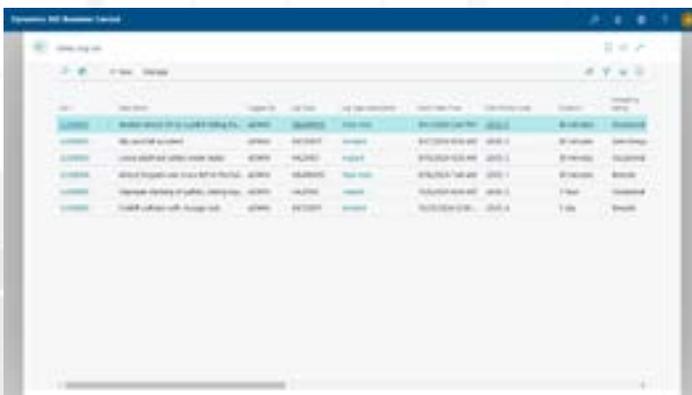

Related Logs
Connect incidents with previous logs for a comprehensive incident history, enhancing analysis and reporting.

Real-Time Reporting
Generate incident summaries and reports for fast, reliable insights into safety performance.
